

Installing 0.8.5 Skyfire on a Symbian Device via PC

The latest version of the Skyfire browser for Symbian devices requires Symbian (Nokia N or E series – third edition).

Note: Before beginning to install Skyfire, we recommend that you first stop all processes currently running on your device. To do this, press and hold the Menu key. A list of all currently running processes is displayed. Select each process and press the Clear key.

To install Skyfire on a Symbian Mobile device:

1. Go to <http://get.skyfire.com>.

The Skyfire delivery site is displayed.
